

Dr. Greig D. Taylor

Greig has recently been appointed as a Clinical Lecturer in Paediatric Dentistry based between Newcastle University/ Newcastle upon Tyne NHS Hospital's Trust in the UK.

Having graduated with honours in 2012, he was awarded Masters in Clinical Research (with distinction) and completed specialist-level paediatric dental exams in 2019.

He took time out of training to undertake his PhD, funded by the National Institute for Health Research (NIHR) Doctoral Research Fellowship.

He recently submitted his PhD, entitled the DECIDE study "Dental ExtraCtion versus filling In aDult teeth: an economic evaluation", based at Newcastle University. Greig's main research interests focuses on addressing the lack of evidence currently available for the pathways relating to child's oral health, namely molar incisor hypomineralisation and dental trauma, as well as using economic evaluation methodologies to address these issues.

Greig has published and presented nationally and internationally in these areas and was co-author on both the recently updated European Academy of Paediatric Dentistry: Best clinical practice guidelines for MIH and Royal College of Surgeons of England guideline for the Extraction of First Permanent Molars in Children.
